

# 2<sup>nd</sup> International Conference on Sustainable Fisheries (ICSF) 2022

## Fisheries for achieving SDGs

16-18 September 2022

Call for abstract

The Sustainable Development Goals (SDGs) is a global development agenda that has been characterized as universal, transformative and integrative, and which is embraced by all countries. With several SDGs directly linked with the environment and resources (such as poverty, food, health, climate change, consumption and production, and oceans and terrestrial ecosystems), sustainability is central to the 2030 Agenda. As such, fisheries (both inland and marine) can substantially contribute to achieve several SDGs. However, the role of fisheries in meeting the challenges of SDGs are still underappreciated despite its importance. The conference will be an interactive platform for researchers, policymakers, environmental managers, industry, and those interested in discussing and sharing ideas and knowledge towards producing a broad view of the fisheries-SDGs linkage. The output of the conference will help to raise public attention and political will to appreciate the role of fisheries in achieving SDGs. We invite you to participate in the 2<sup>nd</sup> ICSF 2022 in Sylhet!

### Program Themes

- Aquaculture and nutrition
- Aquatic resource management and conservation
- Oceanography and blue economy
- Fish biology, genetics and biotechnology
- Fishing, processing and value addition
- Fish health, pharamacology and pollution
- Climate change and fisheries
- Socioeconomics, livelihoods and gender
- Fisheries strategies, planning and policy

### Session Organization

- The conference will be organized in sessions according to themes
- Duration of each oral presentation will be 10 minutes
- Poster session will be in tea break period
- The official language of the conference will be English

### Participation and Selection Criteria

Selected participants in the conference are expected to present their research work (oral or poster). Submitted abstracts will be reviewed by the Scientific Committee for appropriateness to the conference.

### Publication

A book of abstract will be published and provided to conference participants at registration desk.

### Deadline

Submission of abstract: 30 July 2022

Notification of acceptance: 31 July 2022

Registration: 05 August 2022

### Contact Person

Professor Dr. Mrityunjoy Kunda | Email: kunda.arm@sau.ac.bd

Professor Dr. M. M. Mahbub Alam | Email: mhbb\_alam@sau.ac.bd

### Conference Venue

Conference Hall, Faculty of Fisheries

Sylhet Agricultural University, Sylhet, Bangladesh

Please submit your abstract to: [icsf@sau.ac.bd](mailto:icsf@sau.ac.bd)
